Using the Theme

To use the UNL Theme, add

```
theme: UNLTheme
```

to your YAML metadata

To pass options to the package, use

```
themeoptions:
  - left
  - hideothersubsections
```

Using the Theme

There are also several options that you can pass:

- `hideothersubsections` – This hides subsections in the sidebar *other than* the subsections of the current section.
- `hideallsubsections` – This option doesn't print *any* subsections in the sidebar.
- `width` – sets the width of the sidebar, default is `"2.5\baselineskip"`
- `height` – sets the height of the header, default is `"2.5\baselineskip"`
- `left` – sets the sidebar to the left of the slide (default).
- `right` – sets the sidebar to the right of the slide.

How to Get The Theme

The theme is available in the UNL Statistics Templates repository.

You need `You need beamerthemeUNLTheme.sty` and `UNL.pdf` (the UNL logo).

Place them in the working directory or add them to `beamer/themes/theme` or somewhere in your LaTeX path and you're good to go!
